EXPERIENCE

DATA LEAD • MICHIGAN COLLABORATIVE FOR TYPE 2 DIABETES (MCT2D) 2020-PRESENT

- Lead data operations for a statewide collaborative quality initiative, including data extraction, transformation, analysis, and reporting
- Design and maintain data pipelines integrating multiple data sources such as payer claims, APS clinical data, SDOH data, etc.
- Develop visualizations and reports to support clinicians and program decision-making
- Collaborate with clinicians, analysts, and IT teams to define requirements and implement scalable solutions
- Support and guide data analysts; ensure data quality, consistency, and process reliability

APPLICATIONS SYSTEMS PROGRAMMER ANALYST • UNIVERSITY OF MICHIGAN, SCHOOL OF INFORMATION 2020-PRESENT

- Partner with academic and administrative units to deliver data-driven insights for planning and operations
- Build and maintain data pipelines integrating external vendor systems (EAB Navigate360, CourseDog, Lattice)
- Develop automation scripts to streamline reporting and reduce manual effort
- Perform data validation and audits to ensure accuracy and integrity
- Provide technical support and training to staff on data tools and reporting
- Contribute to full-stack development projects, including institutional web applications

ADJUNCT LECTURER • UNIVERSITY OF MICHIGAN, SCHOOL OF INFORMATION 2021-PRESENT

- Teach graduate-level courses in health data analytics and applied data science
- Develop course materials, assignments, and assessments
- Support student learning through instruction and project guidance
